

Mobile Programs

Mobile Programs is the traveling education stream of Ocean Wise®. We bring ocean education to schools, youth groups, and communities coast to coast. To date we have engaged over 625,000 students, youth and community members.

Programs feature live animals, marine artifacts, and hands-on interactive activities designed to encourage stewardship of our oceans and waterways. Our educators deliver expert level, multi-sensory aquatic programs, based on the Ocean Literacy Framework.

Schools | Programs for K-12, satisfy a wide range of learning outcomes. We strive to create a lasting connection to our oceans and aquatic habitats by encouraging direct conservation action.

Youth Camps | Delivered at your location, these programs are designed to inspire future generations of ocean champions who understand more about our oceans and how to protect its precious life.

Community Events | We provide a memorable, unique and captivating experience at festivals and events through highly interactive, direct conversations.

We bring the ocean to you with logistical ease and provide a memorable, unique and engaging experience for all ages.

For information on how to get involved email mobile@ocean.org

"Small groups and well-trained, positive, passionate staff make this an amazing, in-school field trip."
